

Preparedness in Hämeenlinna

Anne Iijalainen

Director of Human Resources and
Preparedness

City preparedness plan

Objective: Maintain city services under all conditions – normal, crisis, and emergency

City plan – public, general information on i.e:

- Crisis management
- Actions during exceptional situations and disturbances
- Incident management
- Threat assessment and severity classification

Attachments – classified, detailed plans for:

- Evacuations
- Communication
- ICT
- Urban Planning and Infrastructure
- Education and Welfare Services

Emergency Drills- a critical lifeline

- Ensure readiness and improve resilience
- Strengthen cooperation

Annual Practices:

- Either city- level or regional
- Themes change to address evolving risks
- National Cybersecurity drill
- Building evacuation and shelter-in-place

Recent Themes:

- Mass evacuation of Southeast Finland (2025)
Major railway or motorway accidents, prolonged power outages, water contamination

Strong Cooperation for Effective Emergency Response

Cooperation and regular meetings even under normal conditions:

- Regional Rescue Services
- Police
- Defence Forces
- AVI, Regional State Administrative Agency (RSAA)
- Local parish
- Voluntary Organizations
- Companies and Corporate Groups
- Finnish Association of Local and Regional Authorities (Kuntaliitto)

Thank You !

Collaboration between private and public sector on a national and regional level

Nordregio Forum 2025

Panel discussion: Mapping Nordic resilience – a Nordic crisis tour

December 3, 2025

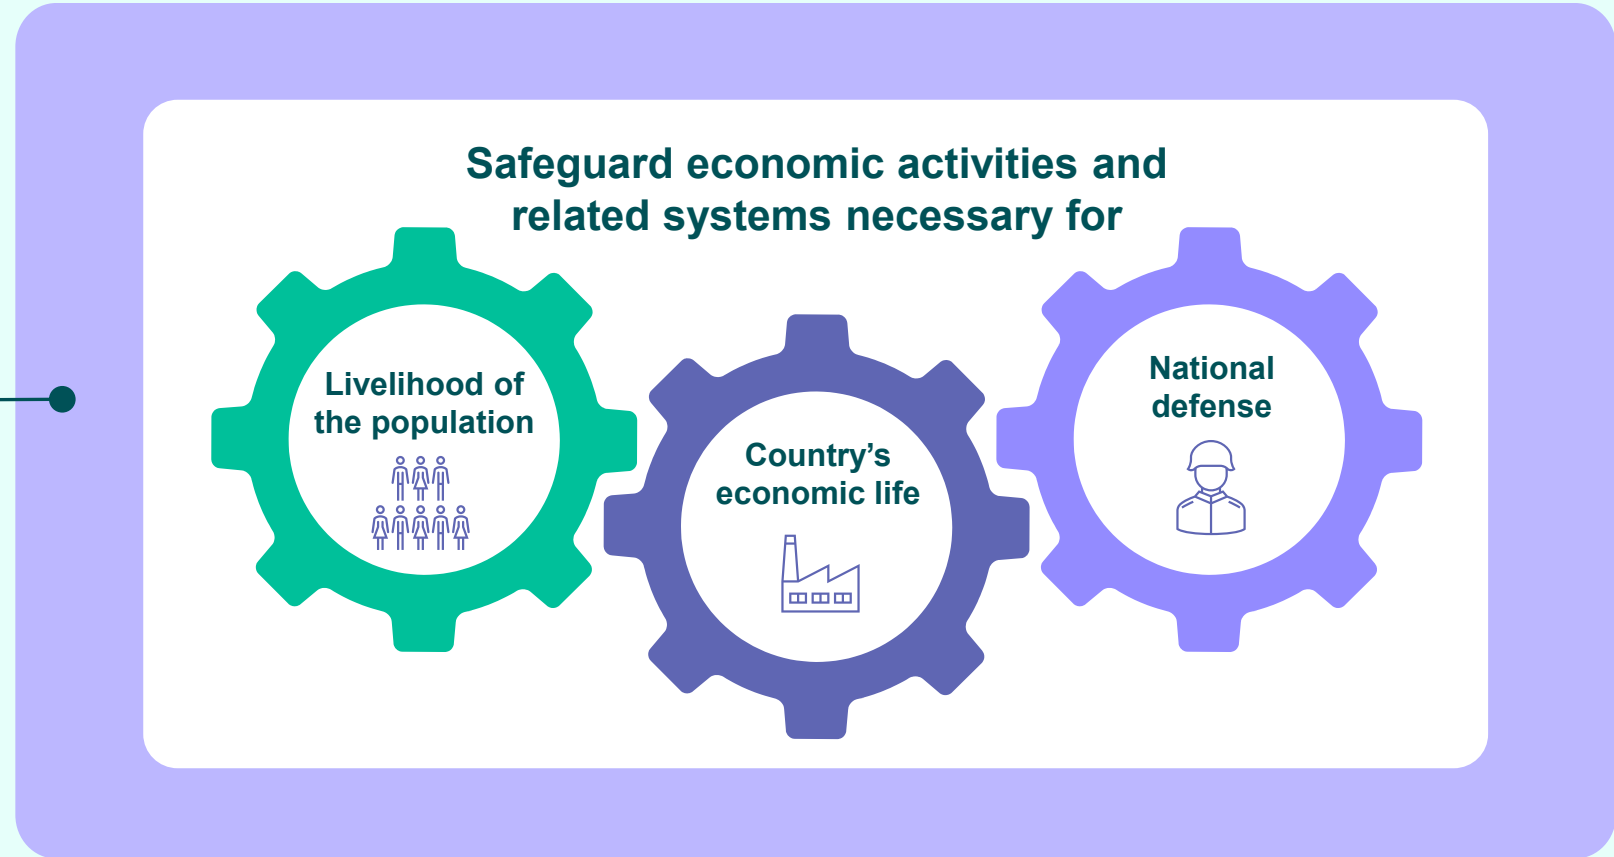

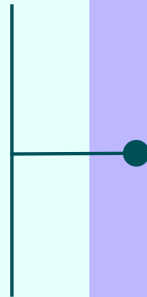

Ville Anttila

Chief preparedness specialist
Network Co-Operation Unit
National Emergency Supply Agency

Security of Supply *

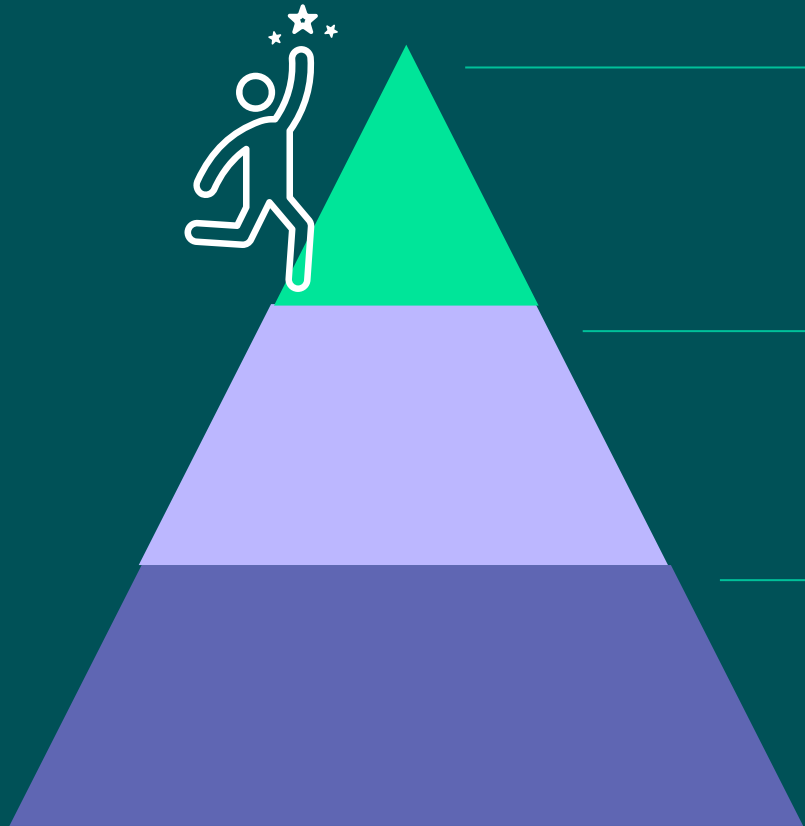

Exceptional
conditions and
comparable
serious
disruptions

* According to Security of Supply Act (1992)
Laki huoltovarmuuden turvaamisesta 1390/1992, 1 §

Layers

Voluntary based preparedness cooperation (network)

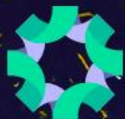

- Trusted information exchange on risks, threats, vulnerabilities
- Exercises, training
- Best practices

Contract-based preparedness arrangements

- Business continuity agreements
- Material and immaterial preparedness arrangements e.g. stockpiling contracts

Regulation based preparedness requirements

- Minimum requirements set by national and EU legislation
- Competent authorities supervise and support

Huoltovarmuuskeskus
Försörjningsberedskapscentralen
National Emergency Supply Agency

Vision

Shockproof Finland

Key phenomena in the operating environment

Changes in the
security environment

Climate change

Requirements for
critical infrastructure

Changes in the
regulatory environment

Economic preconditions
for security of supply

Mission

We work together to build a crisis-resistant society so that even in a crisis, Finnish society will keep functioning and life will continue with minimal disruptions.

Scenarios:

1. Military threat
2. Hybrid influencing
3. Severe disruptions of the global economy

Focus areas during the strategy period

Energy supply

Transport and
supply chains

Digital security and
security of information

Food and
water supply

Production arrangements
with industry for serious crises

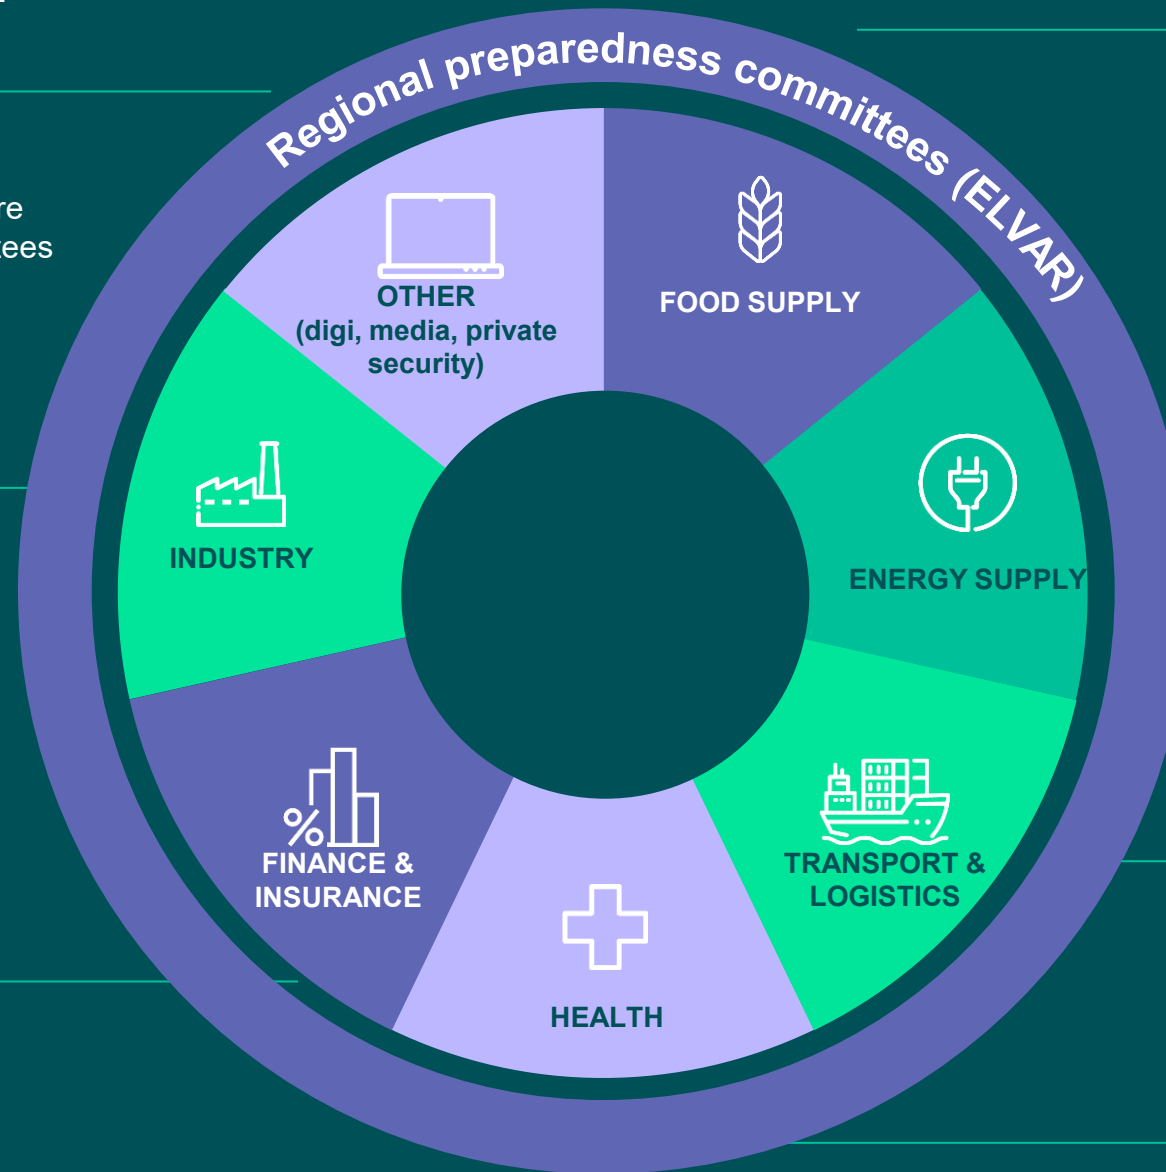

Public-private cooperation in security of supply

- Media
- Private security
- Digital services and infrastructure
- Regional preparedness committees

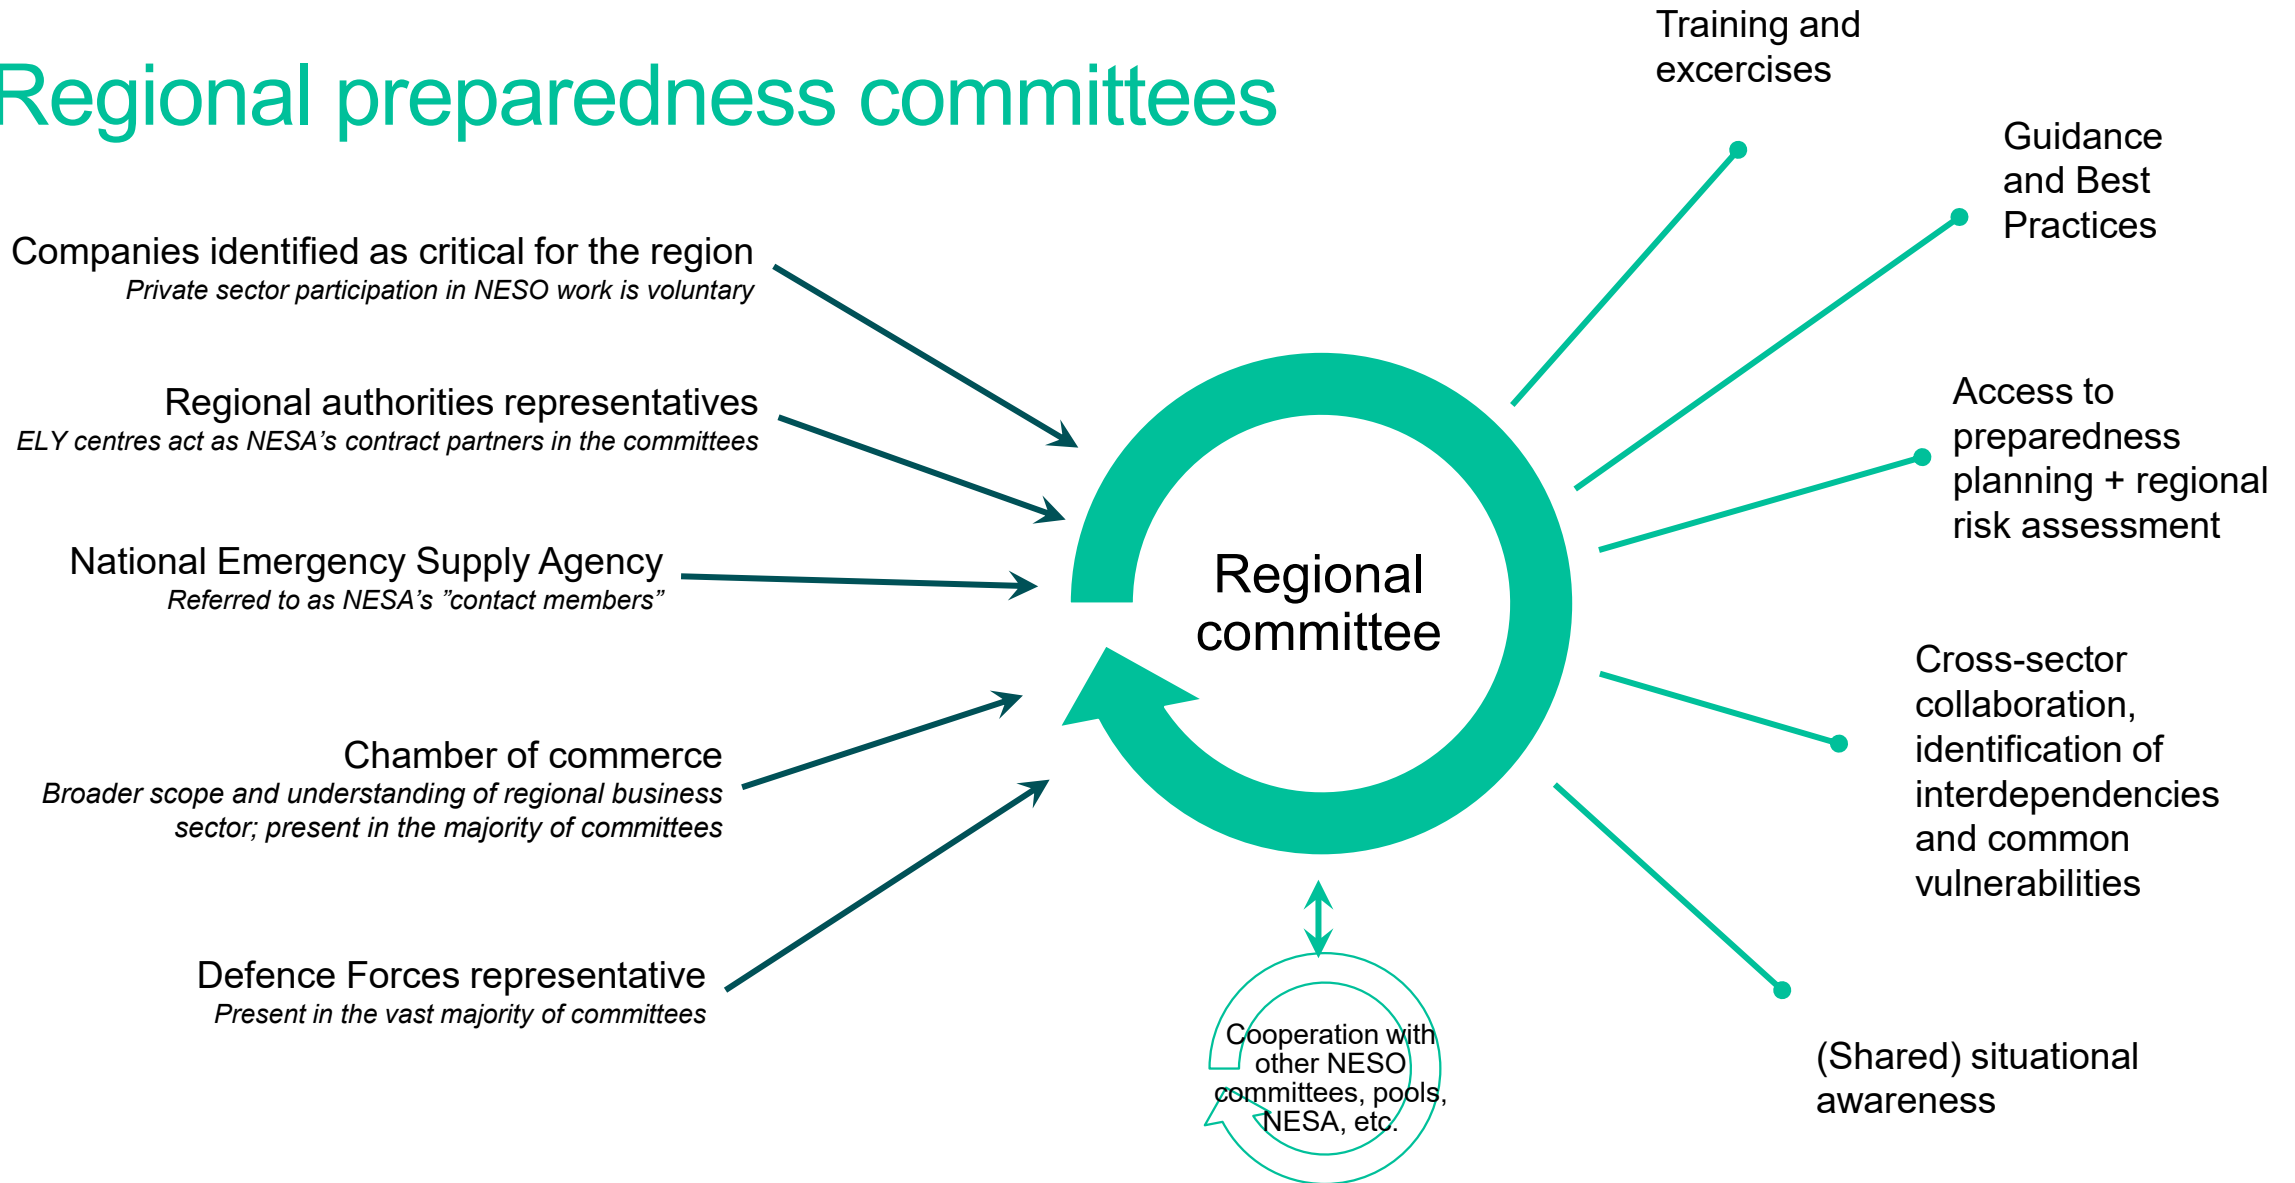

- Technology
- Forestry
- Defense
- Plastic and rubber
- Chemistry and textile
- Constructions + regional construction committees

- Finance
- Insurance
- Economic management

Regional preparedness committees

Pre-conditions for Public- Private Partnership

EMERGENCY PREPAREDNESS, CIVIL DEFENCE AND TOTAL DEFENCE

- Civil preparedness

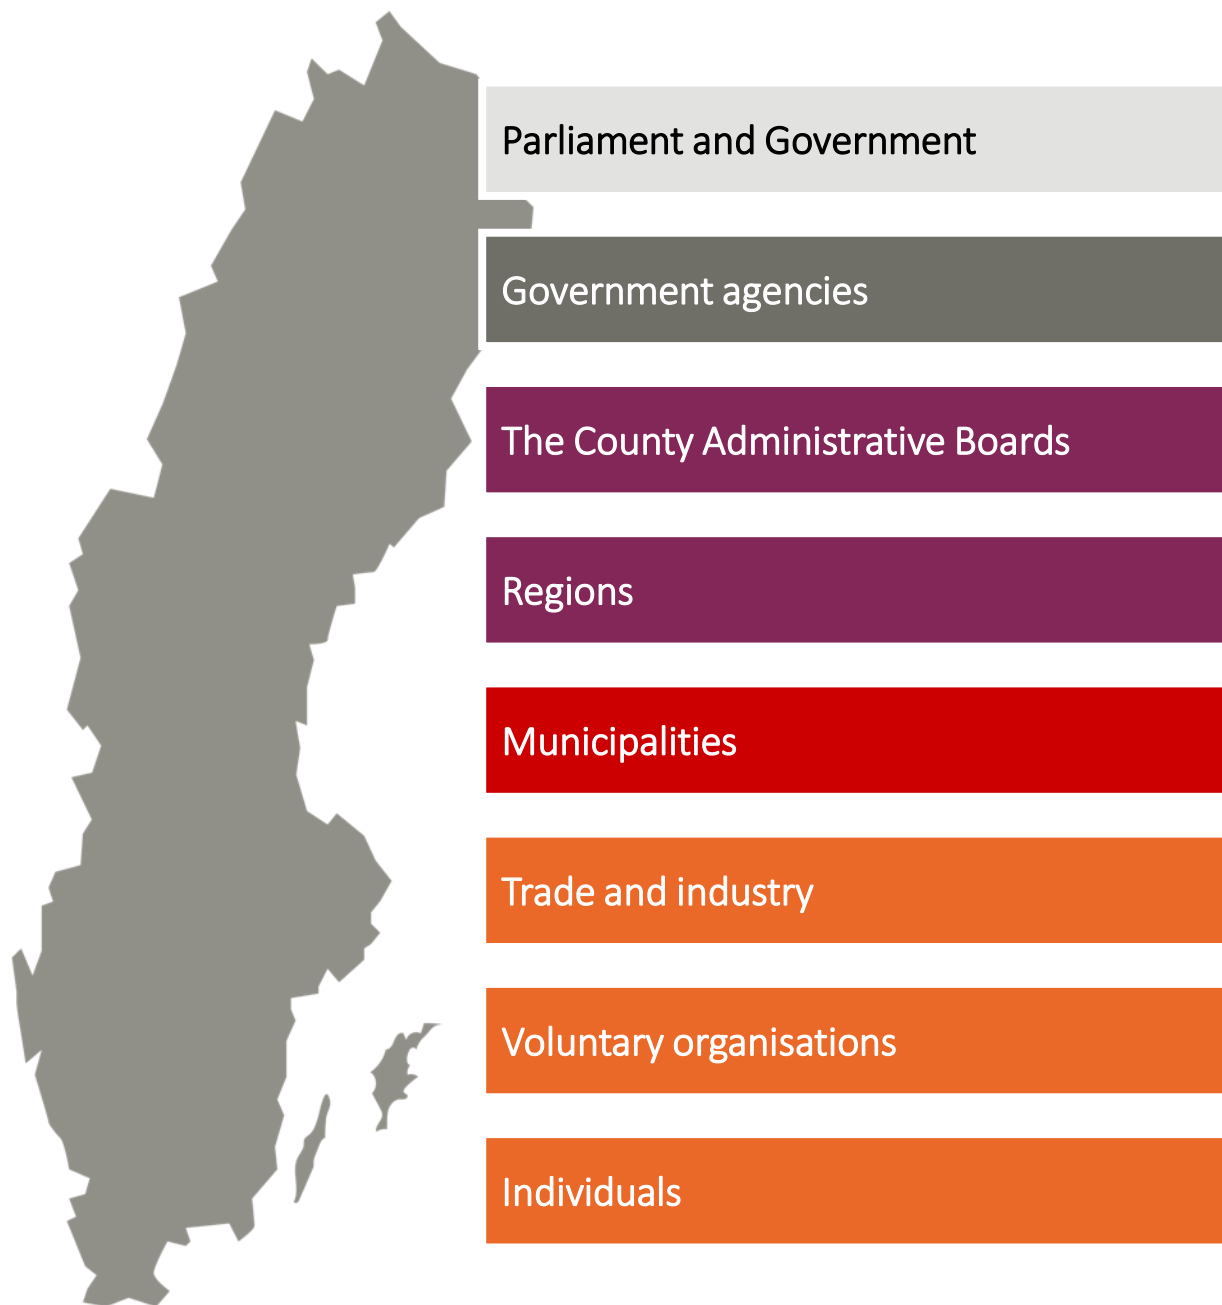

Swedish Civil Defence and Resilience Agency

Together for a strong Civil Defence

**leading agency,
responsible for directing
and coordinating the
civil defence work**

**sectoral responsibility for
rescue services and
protection of the
population**

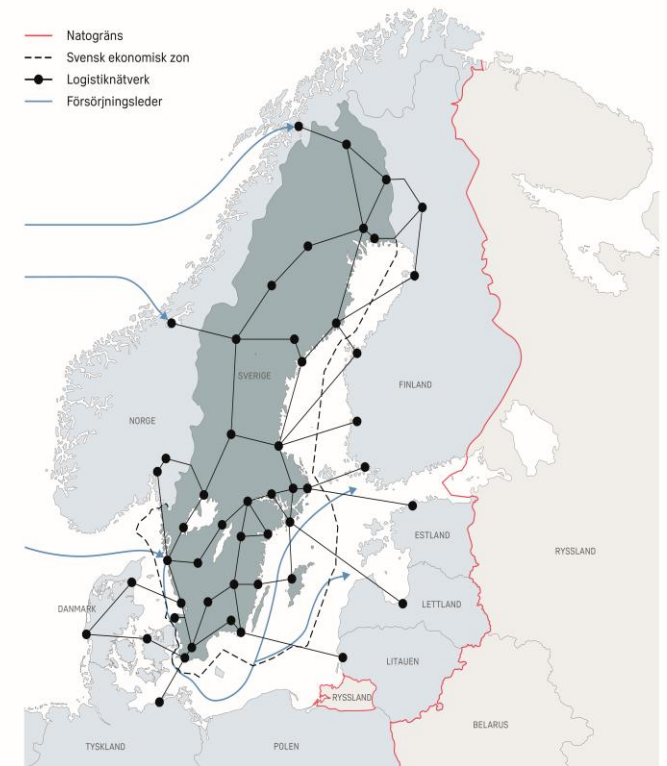

CIVILIAN ACTORS

Civil preparedness covers the whole of society, and requires the collaboration of many actors, government agencies, municipalities, regions, industry and NGOs.

Everyone who lives in Sweden shares a collective responsibility for our country's security and safety.

Seven dimensional cases

1. Hybrid threats
2. Host nation support
3. Attack against northern parts of Sweden
4. Attack against the island of Gotland in the Baltic Sea
5. Remote attacks
6. Reinforcement of the alliance's northern flank
7. Reinforcement of the alliance in the Baltic States

Sweden's Total Defence Concept – public Awareness

- Led by the Swedish Civil Contingencies Agency (MSB), Agency for civil defence 1 Jan 2026
- Sent out to 5 million households
- Provides guidance on emergency preparedness and crisis management
- Explains individual responsibilities during national emergencies
- Activated during heightened tensions, natural disasters, potential conflict
- Equip citizens with actionable instructions and improve national readiness

**In case of
crisis or war**

The High North Cooperation

Interregional civil preparedness cooperation in northern Finland, Sweden, and Norway.
